Date of Report (Date of earliest event reported): May 2, 2024

GLOBAL CLEAN ENERGY HOLDINGS, INC.
(Exact Name of Registrant as Specified in Charter)

Delaware

(State of Incorporation)

000-12627

(Commission File Number)

87-0407858

(I.R.S. Employer Identification No.)

2790 Skypark Drive, Suite 105, Torrance, California

(Address of Principal Executive Offices)

90505

(Zip Code)

(310) 641-4234

(Registrant's Telephone Number, Including Area Code)

Check the appropriate box below if the Form 8-K filing is intended to simultaneously satisfy the filing obligation of the registrant under any of the following provisions:

- Written communications pursuant to Rule 425 under the Securities Act (17 CFR 230.425).
- Soliciting material pursuant to Rule 14a-12 under the Exchange Act (17 CFR 240.14a-12).
- Pre-commencement communications pursuant to Rule 14d-2(b) under the Exchange Act (17 CFR 240.14d-2(b)).

Pre-commencement communications pursuant to Rule 13e-4(c) under the Exchange Act (17 CFR 240.13e-4(c)).

Securities registered pursuant to Section 12(b) of the Act

Title of Each Class	Trading Symbol	Name of Each Exchange on Which Registered
None	N/A	N/A

Indicate by check mark whether the registrant is an emerging growth company as defined in Rule 405 of the Securities Act of 1933 (§230.405 of this chapter) or Rule 12b-2 of the Securities Exchange Act of 1934 (§240.12b-2 of this chapter). Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Item 7.01. Regulation FD Disclosure.

On May 2, 2024, Global Clean Energy Holdings, Inc. (the “Company”), Louis Dreyfus Company (“LDC”) and Bayer issued a press release announcing a strategic collaboration to promote camelina cultivation in Argentina as part of Bayer’s PRO Carbono Program, in line with the companies’ efforts to drive decarbonization in the supply chain and, ultimately, more efficient and sustainable agricultural production. A copy of the press release is attached as Exhibit 99.1 to this Current Report on Form 8-K and is incorporated into this Item 7.01 by reference.

In accordance with General Instruction B.2 of Form 8-K, the information contained in this Current Report on Form 8-K under Item 7.01 and set forth in the attached Exhibit 99.1 is deemed to be “furnished” solely pursuant to Item 7.01 of Form 8-K and shall not be deemed to be “filed” for purposes of Section 18 of the Securities Exchange Act of 1934, as amended (the “Exchange Act”), or otherwise subject to the liabilities of that section, nor shall such information be deemed incorporated by reference into any filing under the Securities Act of 1933, as amended, or the Exchange Act, except as expressly set forth by specific reference in such a filing.

Forward-Looking Statements

This Current Report on Form 8-K contains forward-looking statements. All statements other than statements of historical fact are “forward-looking statements”, including any statements of the plans, strategies and objectives for future operations, the likelihood of improving camelina yields or achieving any profitability therefrom, our ability to expand our work in Argentina, our ability to become a key contributor to regenerative agriculture, strategic value creation, risk profile and investment strategies, and any statements regarding future economic conditions or performance. In some cases, forward-looking statements can be identified by the use of terminology such as “may,” “will,” “expects,” “plans,” “anticipates,” “intends,” “believes,” “estimates,” “potential,” or “continue,” or the negative thereof, or other comparable terminology. These forward-looking statements are made based on expectations and beliefs concerning future events affecting us and are subject to uncertainties, risks, and factors relating to our operations and business environments, all of which are difficult to predict and many of which are beyond our control, that could cause our actual results to differ materially from those matters expressed or implied by these forward-looking statements. Please refer to the risk factors discussed in our Annual Report on Form 10-K and Quarterly Reports on Form 10-Q, which can be found at the SEC’s website www.sec.gov. The discussion of these risks is specifically incorporated by reference into this press release. Any forward-looking statements are made as of the date of this press release. We do not intend, and undertake no obligation, to update any forward-looking statements.

Item 9.01 Financial Statements and Exhibits.

Louis Dreyfus Company (LDC), Global Clean Energy Holdings, Inc., and Bayer Announce Strategic Collaboration to Promote Camelina Cultivation in Argentina as Part of Bayer's PRO Carbono Program

Buenos Aires, Argentina, May 2, 2024 – Louis Dreyfus Company (LDC), Global Clean Energy Holdings, Inc., and Bayer today announced a strategic collaboration to promote camelina cultivation in Argentina as part of Bayer's PRO Carbono Program, in line with the companies' efforts to drive decarbonization in the supply chain and, ultimately, more efficient and sustainable agricultural production.

Camelina is used as an ultra-low carbon feedstock for advanced biofuels production. It is an "intermediate crop" planted between main crops in Argentina during winter, helping to preserve soil health, especially between summer crops of soy and corn. It is already promoted in Argentina by LDC and Global Clean Energy as part of their strategic collaboration since 2023.

The collaboration announced today is aligned with LDC's global sustainability strategy, a key focus of which is to contribute to global climate goals by driving decarbonization in its operations and supply chains, including through efforts to accelerate adoption of regenerative agriculture practices in key supply sheds.

"This collaboration is an important step toward more sustainable agricultural production in Argentina and is in line with LDC's collaborative approach to sustainable business, taking into account the needs and challenges of all value chain participants — particularly producers, on whom the global food and agricultural system depend and whose actions have such an important role in mitigating climate change," said Juan José Blanchard, LDC's Group COO and Head of Latin America.

Global Clean Energy is the world's leading camelina producer, with over 18 years of camelina breeding history and more than 65,000 acres contracted in the US, South America, and Europe in 2023. Global Clean Energy is dedicated to developing and offering the most adaptable and high-yielding camelina varieties for producers, with an exclusive collection of 20 camelina varieties, including those suited for both spring and winter planting. The company is currently developing new traits (including herbicide tolerance) to introduce camelina cultivation across a wide range of geographies and crop rotations.

Global Clean Energy has partnered with LDC to advance camelina production in South America through superior genetics delivery, camelina seed production, crop promotion, and technical support to producers through its Camelina Company brand.

"We are excited to expand our work in Argentina with LDC by joining forces with Bayer's PRO Carbono program," said Noah Verleun, President and CEO of Global Clean Energy. "This strategic collaboration brings us one step closer to making camelina a key contributor to regenerative agriculture, while scaling sustainable feedstock production for advanced biofuels globally."

Bayer promotes regenerative agriculture by combining sustainable solutions and digital tools to produce more with fewer resources while restoring nature, seeking not only to improve harvests but also to deliver positive results for the environment. As such, and in collaboration with other industry players, Bayer's PRO Carbono program helps producers to implement sustainable agronomic practices that increase productivity, reduce emissions, and capture more carbon from the soil, in particular through direct sowing, increased crop rotation, and cover crop incorporation to keep soils covered for most of the year.

"At Bayer, we are committed to generating transformative change to achieve a carbon neutral future for agriculture. This collaboration marks a significant milestone on the path toward more sustainable agriculture that is resilient to climate change, especially in the current global context that demands food and other products, such as fuel, with a low carbon footprint," said Juan Farinati, President and CEO of Bayer Cono Sur and Head of the Crop Science Cono Sur Division. "Leading the change towards a more responsible agricultural model that restores soils is possible. In this case, by incorporating camelina as a winter cash cover crop alternative, in line with the goals of the PRO Carbono program," he concluded.

###

About Louis Dreyfus Company

Louis Dreyfus Company is a leading merchant and processor of agricultural goods, founded in 1851. We leverage our global reach and extensive asset network to serve our customers and consumers around the world, delivering the right products to the right location, at the right time — safely, reliably and responsibly. Our activities span the entire value chain, from farm to fork, across a broad range of business lines (platforms): Carbon Solutions, Coffee, Cotton, Food & Feed Solutions, Freight, Global Markets, Grains & Oilseeds, Juice, Rice and Sugar. We help feed and clothe some 500 million people every year by originating, processing and transporting approximately 80 million tons of products. Louis Dreyfus Company is active in over 100 countries across six geographical regions, and employs approximately 18,000 people globally.
